Amazon S3 > Compartments > thuongnv25-project1-udacity > Change Static Website Hosting

Change Static Website Hosting

Info

Static Website Hosting

Use this bucket to host a website or redirect requests. [Learn more](#)

Static Website Hosting

☐ Disable

☒ Enable

Type of accommodation

☒ Host a static website

Use the bucket endpoint as the web address. [Learn more](#)

☐ Redirect requests for an object

Redirect requests to another bucket or domain. [Learn more](#)

In order for your customers to access content at the website endpoint, you need to make all of your content publicly readable. To do this, you can modify the S3 Block Public Access settings for the bucket. For more information, see [Using Amazon S3 Block Public Access](#)

Index document

Specify the home or default page of the website.

index.html

Error document - optional
